

## WORKSHOP

# Europe's Emissions Trading Scheme

## The Essentials - the Insights - the look Beyond

Tuesday 23rd March 2010 —2:00-3:00pm—Conference Hall / Foyer

### Overview:

The European Emission Trading Scheme EU-ETS came into effect on January 1st. All airlines with routes into or over European airspace are required to monitor CO<sub>2</sub> emissions.

### **This workshop is dedicated towards the following audience:**

- Airlines directly impacted by the EU-ETS, because they are mentioned on the EU-Operators list. For these airlines the workshop will provide insights about what comes next after the start of the 1st monitoring period and what to expect regarding verification.
- Airlines with no business over EU-airspace that are either planning to fly to Europe in the future or that are concerned about a similar regulation emerging in their home country. These airlines will learn how they can proactively monitor their emissions and what is ultimately required once they are included in the EU-ETS.
